Adapter Jack / Double Jack 3.5mm

CONNECT YOUR HEADPHONES TO THE NEW JACK CONNECTORS!

While the new computers, tablets and consoles are equipped with a single 3.5-mm audio port with 3 positions, many headphones with microphone are equipped with two separate connectors for headphones and microphone not compatible with this new configuration.

Our headphone adapter has two 3.5-mm ports with 3-position which provide a separate headphone and microphone connection that can be connected to the single audio port on your computer, tablet or console.

It also allows you to connect a separate microphone and powered speakers.

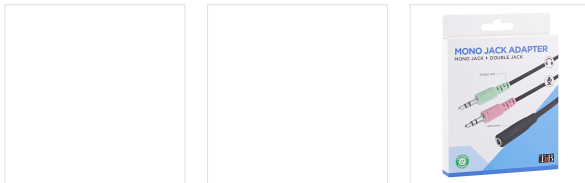

This product is compatible with all 3.5mm Jack connectors (computer / tablets / portable / notebook and any type of console)

Connectivity: 2 x 3.5 female jack / 1 3.5mm male jack.

BOX CONTENTS

- 1 Adapter

- 1 user manual
