SHINY TWS earphones red

TRENDY AND CUTTING-EDGE HEADPHONES!

The unique shapes of the SHINY headphones have been designed to combine ergonomics and performance, while the sleek and ultra-compact design has made these headphones both light and comfortable! Based on the biggest world trends in terms of fashion and colors for the year 2020, we have chosen three colors to dress the case and thus make it a fashion accessory in its own right.

In addition, thanks to the Bluetooth 5.0 technology, it is possible to enjoy an extended battery life of approximately 5 hours as well as an even more faithful sound reproduction. The supplied charging box will allow you to carry your headphones everywhere while recharging them! The box's backup battery provides you with more than 25 hours of listening time. The "touch control" function allows you to control your music or answer your calls just by touching your headphones!

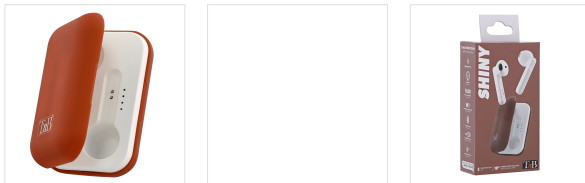

With the feeling of not wearing any headphones, the SHINY range offers you a new way to discover your music. SHINY headphones are the latest in cutting edge technology.
