

## Bike / e-scooter buckle lock

### SECURE YOUR E-SCOOTER IN ONE GESTURE

Secure your bike or scooter against theft with our buckle lock.

The cable is 1 meter long for a diameter of 1 cm.

The lock is attached very simply: pass the cable around street furniture, then the head of the lock inside the loop, and tighten as much as possible. Then pass the head of the lock around your bike or scooter. Slide the attachment point on the cable to form a loop around your vehicle and clip the lock to close it. Your lock is now installed. Use the key provided to unlock it.

When you get back on the road, you can store it in a bag or wrap it around your frame.

### BOX CONTENTS
